## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election without traverse of invention II, claims 16-27 and 34-36, in the reply filed on 30 October 2007 is acknowledged. Claims 1-15 and 28-33 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 16-27 and 34-36 are rejected under 35 U.S.C. 102(e) as being anticipated by Kolls (US006615183B1).
4. Kolls teaches (independent claims 16, 22, 34, 35 and 36, and dependent claims 17 and 23) an image forming and information processing apparatus, and a banner advertisement method, the image forming apparatus comprising:

a communications interfacing mechanism (*system 500*, col. 13 lines 19-25) configured to communicate with a banner advertiser terminal (also *system 500*, col. 33 lines 63-65) via a network (*network 600*, col. 13 lines 24-25);

a displaying mechanism (*system 500* with *display means 580*, col. 33 lines 63-65, col. 15 lines 1-3, col. 6 line 63 to col. 7 line 20 and Fig. 3 and 3A) configured to display a banner advertisement offering at least one of a product and services; and

a response sending mechanism configured to send to the banner advertiser terminal, through the communications mechanisms, at least one of an order and an inquiry for the at

least one of the product and the services offered by the banner advertisement displayed on the displaying mechanism (col. 7 lines 6-20).

For claims 17, 23, 34, 35 and 36, Kolls also teaches displaying when the image forming apparatus is in a "non-operative" state (col. 34 lines 39-41).

5. Note on interpretation of claim terms - Unless a term is given a "clear definition" in the specification (MPEP § 2111.01), the examiner is obligated to give claims their broadest reasonable interpretation, in light of the specification, and consistent with the interpretation that those skilled in the art would reach (MPEP § 2111). An inventor may define specific terms used to describe invention, but must do so "with reasonable clarity, deliberateness, and precision" (MPEP § 2111.01.III). A "clear definition" must establish the metes and bounds of the terms. A clear definition must unambiguously establish what is and what is not included. A clear definition is indicated by a section labeled definitions, or by the use of phrases such as "by xxx we mean"; "xxx is defined as"; or "xxx includes, ... but does not include ...". An example does not constitute a "clear definition" beyond the scope of the example.
6. The instant application contains no such clear definition for any of its claim terms, two of which are unclear. Hence, the examiner is required to give these terms their broadest reasonable interpretation. First, "an image forming apparatus" is interpreted as any apparatus which performs any two or more of the functions disclosed at para. [0004] of the published application (US 20040117258A1). That is taught by Kolls at col. 6 lines 63-65. Second, the examiner interprets "ad registration" (claims 20 and 26) to mean "enrollment", establishing the ad in the server for delivery. This is inherent since Kolls teaches delivery of the ads from the server (*universal server*, col. 13 lines 19-25) to the displaying mechanism, so they must have been "registered" with the server.
7. Kolls also teaches claims 18 and 24 (col. 44 lines 45, where "email" is interpreted as any electronic text communication), claim 19 and 25 (col. 17 lines 50-55, where *transaction receipt* reads on an order return message) and claims 21 and 27 (col. 12 line 49).
